A photograph of a large, multi-story brick building with a sign that reads "DHA SUFFA UNIVERSITY". The building has several windows and a covered entrance area. In front of the building, there are several flagpoles with flags, and some potted plants. The sky is blue with some clouds.

DHA SUFFA UNIVERSITY

DHA Suffa University opened its doors to the youth with a vision to produce world class engineers, computer scientists, entrepreneurs and business leaders; aspiring to be ranked amongst the nation's top educational institutions.

Ever since its inception, DSU has struggled miraculously to become a globally recognized institution for higher education and research.

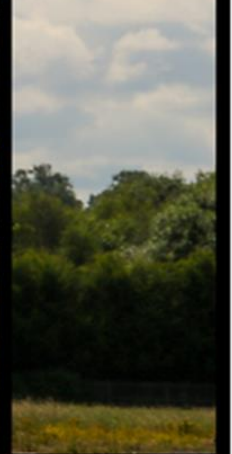

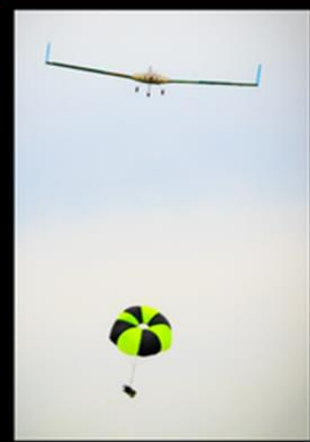

TEAM ZARRAR

Team Zarrar, Aerospace Team of DHA Suffa University, aims to design and fabricate an Unmanned Aircraft System for the ImechE UAS Challenge 2018, United Kingdom.

Team Zarrar, with its relentless efforts, has emerged triumphant on multiple national and international platforms, and continues its venture with the same zeal and enthusiasm.

UAS CHALLENGE

Institution of
**MECHANICAL
ENGINEERS**

COMPETITION OVERVIEW

The UAS Challenge (Unmanned Aircraft Systems Challenge) is the leading annual student competition in the aerospace sector.

The IMechE Unmanned Air System (UAS) Challenge will engage University Undergraduate and Postgraduate teams in the design, construction, development and demonstration of an Autonomous UAS with specific mission objectives. The Unmanned Aircraft (UA) will be designed to undertake a representative humanitarian aid mission. The system will be required to operate automatically, performing a series of tasks such as area search, navigating waypoints, accurately dropping payloads and returning to base via a defined route.

The Challenge bridges the gap between academia and industry in developing applied UAS-related activities, giving you the perfect opportunity to strengthen links with industry, other universities and enhance employment opportunities for graduates in the aerospace sector.
